

## **Procedure 122-03 Personal Protective Equipment**

**Sponsor: Business and Administrative Services**

### **Purpose**

Employees at Coconino Community College may encounter physical and/or chemical hazards during the workday, depending upon job assignments and tasks. These hazards will be controlled by using, in order of preference, engineering controls, administrative controls, and/or Personal Protective Equipment (PPE). PPE is designed to protect employees from serious injuries or illnesses resulting from contact with physical, electrical, mechanical, and chemical hazards, among other things. Additionally, this program defines how to assess potential workplace hazards and select appropriate PPE.

### **Definitions**

None

### **Procedure**

The Occupational Safety and Health Administration (OSHA), American National Standards Institute (ANSI) established regulations governing the use of PPE in the workplace.

The PPE Program outlined in the procedure provides guidance and procedures for the following:

1. Equipment selection, general
2. Equipment selection, laboratories
3. Protective devices
4. Cleaning, inspection, maintenance, storage and disposal
5. Employee training
6. Recordkeeping
